

Actor Descriptions

Teacher

A music teacher who uses the platform to create a teaching profile, manage availability by publishing time slots, and view lesson bookings.

Learner

A student or parent who searches for suitable teachers, views teacher profiles, books lessons, and tracks their scheduled lessons.

Database (Secondary Actor)

The database system stores and retrieves all persistent data including user accounts, teacher profiles, time slots, and bookings.

Use Case Descriptions

UC-01: Register Account

- User enters username, email, password, and user type
- System validates input and checks for duplicates
