

Heuristic Evaluation Report

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	H1-1: Simple & natural dialog	The booking interface contains multiple sections (filter, teacher info, calendar, time selection), which may feel slightly complex for first-time users		2	Improve layout by grouping related elements and simplifying visual hierarchy
2	H1-2: Speak the users' language	Some UI elements still uses English even though the user changes the language to chinese (eg; April does not change to chinese in the pic)		2	Ensure full localization support by translating all UI element to appropriate language
3	H1-3: Minimize users' memory load	Users must remember selected time slots because the selection feedback is not strongly emphasized		2	Highlight selected time clearly and keep it persistent

4	H1-4: Consistency	Button styles are inconsistent across pages . action buttons appear as solid filled on the Login and Sign Up pages, but as outlined buttons on the Student and Teacher Dashboards.		2	Standardize design elements (colors, buttons, layout)
5	H1-5: Feedback	No clear confirmation after actions such as booking a lesson or logging in		3	Add success messages (e.g, “Booking confirmed”) and loading indicators
6	H1-6: Clearly marked exits	Some pages lack clear navigation options such as “Back” or “Cancel” buttons		2	Add visible navigation controls for better user flow
7	H1-7: Shortcuts	No shortcuts for frequent users (e.g, quick booking or saved preferences)		1	Add features like “recent bookings” or quick actions
8	H1-8: Precise & constructive error messages	Login and forms does not display clear error messages when input is invalid		4	Provide clear and helpful error messages (e.g., “Invalid email format”)

9	H1-9: Prevent errors	Forms shaow a generic error message at the bottom after submission, but do not indicate which specific field is invalid or provide inline feedback per field.		2	Display field-specific error messages directly below each invalid field (e.g., "Email is required") and highlight the field in red in real time.
10	H1-10: Help and documentation	No help section or onboarding guidance for new users		2	Add help page, tooltips, or onboarding instructions
